## **DETAILED ACTION**

### ***Acknowledgment***

1. This Office Action is responsive to the Remarks/Amendment filed on 11/14/2005.

### ***Response to Remarks/Amendment***

2. Applicant's amendment/remarks filed 11/14/2005, have been fully considered and as a result claims 1-9, 11-17 and 19-20 are now indicated allowable.

### ***Reason for Allowance***

3. Claims 1-9, 11-17 and 19-20 allowed.
4. The following is an examiner's statement of reasons for allowance:

With reference to claims 1, 13, 14 and 20, the prior art of record in combination with other claimed limitations, neither teaches nor renders obvious a synchronization operation in a communication network comprising:

Defining a node common frame synchronization signal based upon one or more of said input frame synchronization signals wherein said output frame synchronization signal is synchronized in relation to said at least one of the input frame synchronization signal in such a way that:

a) said output frame synchronization signal is permitted to show an arbitrary phase difference in relation to said at least one of said input frame synchronization signal:

Art Unit: 2637

b) said output frame synchronization signal is permitted to show an acceptable phase jitter in relation to said at least one of said input frame synchronization signals: and

c) said output frame synchronization signal is not permitted to show any persistent phase drift in relation to said at least one of said input frame synchronization signal.

Such limitations, as recited in independent claims 1, 13, 14 and 20, are neither anticipated nor rendered obvious by the prior art of record.

Claims 2-9, 11-12, 15-17 and 19, are allowed by virtue of their dependency to claims highlighted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
